Students with an International Baccalaureate (IB) Diploma must meet the following requirements in order for their qualification to be considered equivalent to the *Abitur*.

Among the six examination subjects, students must demonstrate the following:

- Two languages at level A or B; at least one of the languages must be foreign language taken without interruption at the level “Language A: Language and Literature” or “Language B HL”
- One natural science (Biology, Chemistry, or Physics)
- Math (Math SL, Math HL, or Further Mathematics in combination with Math HL)
- Social Studies (History, Geography, or Economics)
- The sixth subject can be one of the subjects listed above, or one of the following: Visual Arts, Music, Theatre, Film, Literature, and Performance, another modern language, Latin, Classical Greek, General Chemistry, Applied Chemistry, Environmental Systems and Societies, Computer Science, Design Technology, World Religions, Philosophy, Psychology, Social Anthropology, Business and Management, Sports exercise and health science.
- One Higher Level subject must be a math or natural science subject (Biology, Chemistry, Physics)
- All subjects must be taken for the duration of the IB program (2 years continuously)
- A minimum score of 4 must be achieved in each exam subject. Where an IB grade of 3 is awarded in one subject only, it is possible to compensate for this if another subject taken at the same level has been awarded at least an IB Grade 5, and an aggregate of 24 points has been attained.
